

ProbeView EMF Software

ETS-Lindgren's ProbeView Software is designed for use with the HI-4413P or HI-44USB fiber converters. ProbeView enables user-selectable viewing options (numeric or graphical), selectable logging, simultaneous display of peak-hold and current field strength data, and graphical representations of field strength versus time.

Key Features

- Support Tool for EMF Measurements
- Supports data viewing from HI-443x and HI-60xx Probe Families, HI-3702
- Turn-key EMF Solution
- Comprehensive Data Viewing Options

Product Features

Data information can be exported as a .CSV file

User selectable data logging setups

Data is displayed both graphically and numerically
