

FieldPort SFP20

USB modem for the configuration of IO-Link devices

Benefits:

- Fast and easy commissioning of IO-Link devices.
- No network scan required, enormous time savings with point-to-point connection.
- Easy, trouble-free configuration of every IO-Link device, including devices from other vendors.
- High degree of flexibility regarding the choice of FDT Frame.

Field of application: The FieldPort SFP20 is a USB modem for the configuration of Endress+Hauser IO-Link devices, and also of devices from other vendors. Combined with the IO-Link CommDTM and the IODD Interpreter, the FieldPort SFP20 complies with the FDT/DTM standards.
